

Mission lifecycle and recovery edges

RECOVERY · terminal / paused statuses

- paused_budget
- provider_cooldown
- provider_fence
- infra_blocked
- backend_unavailable
- waiting (bg job)
- stall → blocked
- no_progress

Daemon boundary: SIGTERM → drain to the mission boundary (no mid-mission kill) · blue/green handoff on source change
Resume adopts only a campaign whose Manager handoff identity (objective hash + vertical + lineage) matches — no re-divide.
